

*Simple access to your InterAction data when out of the office...*

Increasingly, fee earners are relying upon BlackBerry to communicate with their clients and contacts. With so much client and contact information residing in InterAction, think how valuable it would be if the essential information could be accessed via BlackBerry - well it can with the InterAction for BlackBerry link from Calvis.

**The InterAction for BlackBerry link is very easy to implement for your BlackBerry users. The cost<sup>1</sup> is just \$40 per user<sup>2</sup> per year.**

Uses network user name and password to prevent unauthorized access and all data is transferred via the secure BlackBerry Mobile Data Service – so your contact data is safe!

For more information, please contact us at [info@calvis.com](mailto:info@calvis.com) or call on +44 (1748) 813900.

*Notes:*

1. Price correct at January 2008. Please enquire for current pricing.
2. All BlackBerry users in your organization must be licensed.

## Key benefits

- Search your **company's contact list** using search criteria for finding contact and organization including 'sounds like'
- View contact details **including activities** and add useful contacts to **My Contacts** list
- **Call contacts directly** from the returned contact details just by highlighting the number and clicking the track wheel
- Save time by **adding activities** on the way back to the office
- Complements BlackBerry sync if you use it and provides an easy to use mobile contact database if you don't

## Technical Information:

Requires InterAction v5.1 or later including the web client and a Microsoft Windows web server running ASP (preferably IIS v4 or later). Supports all BlackBerry handsets with the BlackBerry Browser and Mobile Data Services enabled.
